CONTENT DELIVERY APPLICATION

CLOUD ADWORD

Cloud AdWord can seamlessly deliver HD Videos, Dynamic Slide Shows, Weather forecast, content from Social Network Service, RSS, Virtual queue, App Integration, Interactive polls and much more.

Revolutionize the conventional television at your business and have centralized control over the content you publish on your screens which can be managed from any web browser on any device.

Cloud AdWord is a Cloud Based Media Content Delivery Application built to Create, Design and Schedule Content on any Digital Screen. Add your device using a Custom Layout or select from a default list of Layouts. All you need to do is either Drag & Drop Media from Media Library, Connect to the Integrated Information Centre or Library of Add-Ons.

MEDIA

MANAGEMENT

Media Library (Images \ Videos \ Documents)

Easy to use high performance Media\Content storage repository, designed for use with Cloud AdWord Screen Management for both throughput and transaction intensive capability at any scale.

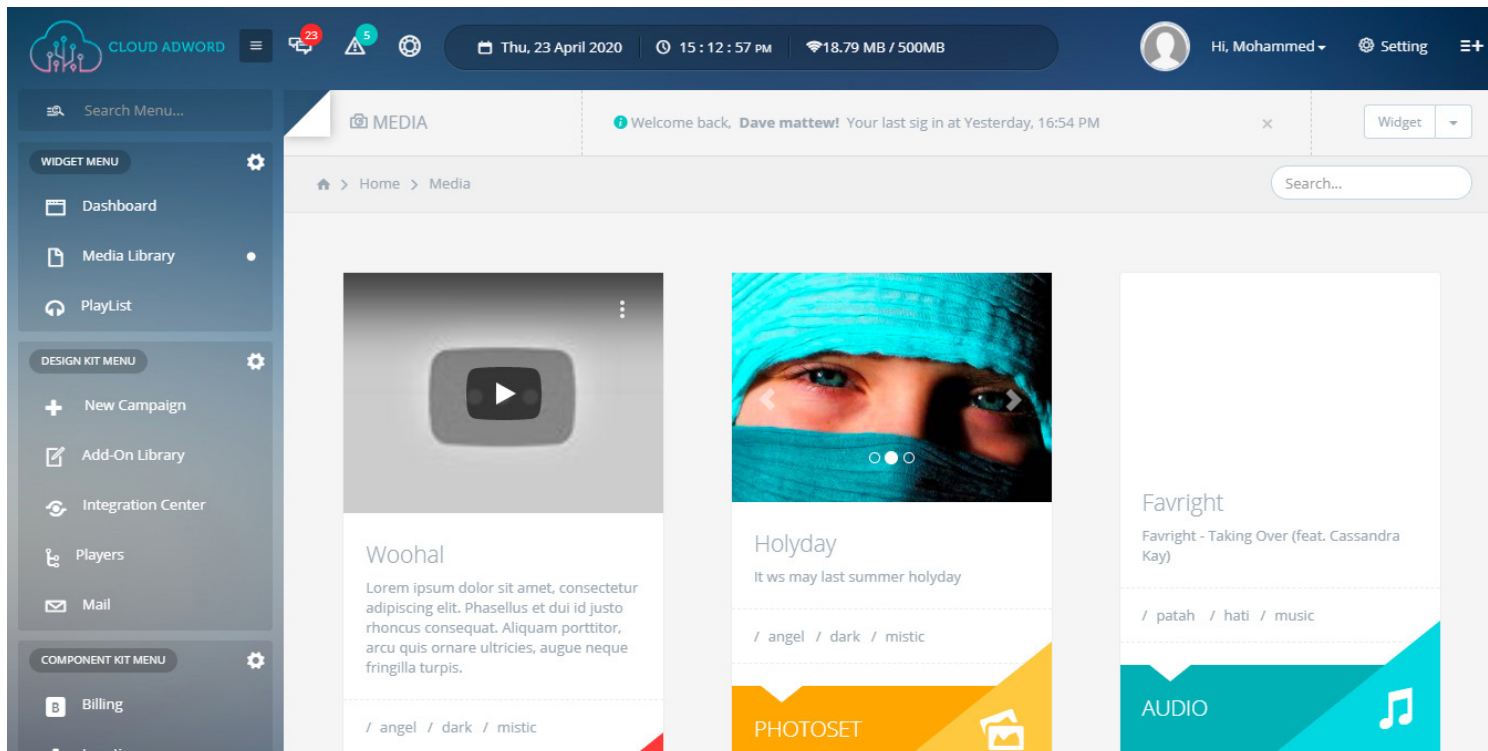

It helps you create Media Library. Our media library aims to help you discover, explore and improve the content published using Cloud AdWord content delivery application. Media library consists of the images, video, recordings, and files that you upload and use while casting a Campaign in the Application. Content in the Media Library can be organized with nested folders and tag content to make content management easy.

Performance

Media\Content storage repositories are performant for your most demanding capabilities. SSD-backed options include a volume designed for high performance throughput and transaction intensive capability at any scale.

Easy to Use

Media\Content storage repositories is easy to create, use, encrypt and protect your data. It allows you to increase storage without any disruption to your capabilities.

Highly Available and Durable

Content repository architecture offers reliability. The storage is designed to protect against failures, offering 99.999% availability and an annual failure rate (AFR) of 0.1%-0.2%.

Highly Scalable

The Cloud Application enables you to increase storage without any disruption to your capabilities.

Secure

Built to be secure for data compliance that can be encrypted by default with a single setting in your account. It supports encryption of data at-rest & data in-transit which has zero impact on performance.

Cost-Effective

Apart from the default repository size, additional storage comes in an optimized cost. The repository deduplication option eliminates data duplication and save on storage cost.

SCREENS & PLAYERS

CAMPAIGN MANAGEMENT

Format

HD-Ready | Full HD or 4K Ultra HD

Campaign

Publish Content

Add Device

You can easily add new devices online by installing Cloud AdWord App from the store based on the Operating System (Linux, Windows, Android & iOS). Cloud AdWord is tested against top industry standard hardware offering reliability and compatibility across latest formats be it HD-Ready, Full HD or 4K Ultra HD.

Create Layout

You can choose a layout using the sample screens or create a layout defining screen orientations (Portrait and Landscape), screen size, aspect ratio, screen resolution (Width\Height, Inch\CM\MM\Pixels)

Create Division

You can use the layout as it is or create divisions. Note that, these divisions can act as an independent screen themselves playing Individual Content each time.

Create Group

You can create and manage groups of screens (Devices) and easily label them with group names. Cloud Adword lets you publish same content at once on all the screens in the group.

Drag & Drop Media from Library (Playlist or Campaign)

You can Drag & Drop content from Media Library into the order of each division created in a screen layout and change default duration for different media types with timelines. You can also create a Playlist or Campaign and publish the content to the desired screen.

Schedule & Publish

You can schedule your content in advance and choose when it expires. Schedule and publish your content to a Full Screen or a Division by date, hour, day and location. Once the schedule is created the content is published to the screens as defined.

USER MANAGEMENT

USER ACCOUNTS & PERMISSIONS

Workflow

Approvals

User Management is flexible, with an extra level of security. It lets you enable or limit access to content, settings & displays for individuals or groups of users. Our enhanced role-based security model determines who can publish what content based on permission levels.

User Groups can help create permission level within a company and allocate permissions to publish content not only to devices and screens but also to screen divisions.

LIBRARY OF ADD-ONS

Our growing library of add-ons helps you connect to your favourite services and create and publish content on the go.

Notice Board

Select a background colour theme, type your message with font, and play the announcement on your screens. Schedule signs ahead of time to display on certain days or times.
